### **IMPACT RECOVERY SYSTEMS, INC. INTRODUCES NEW HIGH PERFORMANCE CHANNELIZER MANUFACTURED UNDER THE BRAND NAME OF TUFF POST.**

**SAN ANTONIO, TX. - March 5, 2008-** TUFF POST, manufactured by Impact Recovery Systems, Inc., is a channelizing post accepted by the Federal Highway Administration as a crashworthy traffic control device for use on the National Highway Systems. The Tuff Post is made of durable polypropylene for flexibility and strength and utilizes our proven reactive spring assembly. Developed to meet the harsh demands of high speed, 2-way roadways, it is the only post in the industry that has been tested and certified to withstand 50 hits at 55 mph and still remain upright with no vertical or horizontal listing. Typical applications for the Tuff Post could include Work Zones, Parking Lots, Airports, High Speed Traffic Lanes, HOV Lanes and Curves. Posts are available in colors yellow, white, and orange and lengths of 36”, 42”, and 48”. **Tuff Post. Setting a Higher Standard.**

Impact Recovery Systems, Inc. manufactures flexible high impact traffic delineation devices designed for use on highways, in work zones, and permanent applications. NCHRP-350 accepted. For additional information, please visit the website at [www.impactrecovery.com](http://www.impactrecovery.com).
