

Tired of replacing your steel signposts?

Save money using the IRS™ line of parking posts

Impact Recovery Systems manufactures the most cost-effective flexible traffic control products on the market today. Our products combine high impact plastics and energy absorbing mechanics, resulting in the industry's first fully integrated sign system.

- Reduces your property damage liability
- Creates a safer environment for your customers
- Improves the life of your traffic control equipment

— NCHRP 350 Approved Crashworthy —

The heart of the system is a unique reactive spring with the strength to support not only a flexible post, but an information panel as well. This reactive unit gives upon impact and is designed to reorient the panel towards traffic.

PARKING LOTS

*“Impacting Today’s Roads for a
Safer Tomorrow”*

Minimizes Labor

Fixed base easily attaches to asphalt with #165 anchor kit

To unlock assembly simply pull keeper pin and rotate 90°

Lift assembly to remove from base

Low profile fixed base remains in place

Molded-in carrying handle allows easy placement of portable base

Easy to transport sign and base to desired location

The optional quick release system utilizes a pull-pin as outlined above and is designed for applications where a changeable and/or movable sign is required. The standard bases require four (4) socket cap screws for installation of the post to the base.
