

# IMPACTrecovery SYSTEMS

"Performance for a Safer Tomorrow"

## PRODUCT BULLETIN

Date: February 22, 2018

Products Affected: Lower Knuckle – Standard Springs

Change: Design and Mold Revisions

Beginning in late 1Q2018 or early 2Q2018 surface mount spring assemblies will be shipped with a lower knuckle revised to "REV B".

The only change from "REV A" is an increase in thickness of at the thinnest part of the quick release keyhole. This is a change made to improve the strength of the knuckle in quick release configuration.
