**IMPACT
TRAFFIC**
REBOUNDED TRAFFIC SAFETY DEVICES

REACTIVE SPRING TECHNOLOGY INSIDE

Built into every Impact Traffic object marker is our patented, anti-twist reactive spring assembly. This unique compression spring allows our markers to sustain vehicle impacts from any direction and return to its original, upright position time and time again.

TYPE "K" OBJECT MARKERS

Mark obstructions adjacent to the roadway with Impact Traffic's line of rebounding object markers. These highly visible, flexible markers are MUTCD compliant and they are ideal for marking island ends, gore areas, bridge abutments and other similar obstructions.

PRODUCT FEATURES

- **Markers Yield Fully Upon Impact** and return upright when struck
- **Constructed of High Quality, Durable Flexible Plastic**
- **Resistant to Damage** from ultraviolet light, ozone and hydrocarbons
- **Superior Retro-Reflectivity** Type IV high intensity sheeting included in two pattern types
- **Reduced Maintenance** with an innovative component design
- **MUTCD compliant**
- **Federal Acceptance: WZ-2A**

TYPE "K" OBJECT MARKERS

PRODUCT SPECIFICATIONS

K-1 MARKER (Bibbed)

Product Specifications		
Marker Type	Three Sheeting Squares	Single Reflective Sheet
R. Sheeting Pattern	Three 3" x 3" squares	Single 12" x 6" sheet
Dimensions	12" x 18" overall	
Post	14" white HDPE Flexible Sign Post with cap - 2.375" OD	
Target Plate	12" x 16" tapered - white, polyethylene plastic	
Reflective Sheeting	High intensity - Type IV or diamond grade sheeting	
Spring Type	Fixed or Drivable spring types available*	
Compatible Bases	Surface Mount Fixed or Drivable bases*	

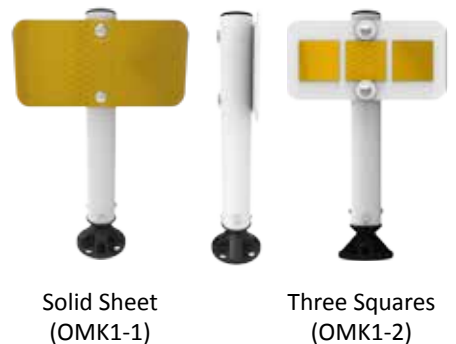

*Base and base mounting hardware is sold separately. Post spring type must be specified at time of order.
