

PRODUCT BULLETIN

Date:	May 1, 2024
Products Affected:	Sta-Rite Bollard Enhanced SignPosts
Change:	Revised Bollard

Impact Recovery Systems is excited to announce a significant upgrade to our popular Sta-Rite SignPost line. The newly revised bollard enhanced version offers improved features designed to enhance visibility, aesthetics, and durability.

Product Enhancements:

- **Larger Diameter and Domed Cover:**
The new design features a larger diameter and domed bollard cover that fully encases the spring system. This enhancement not only improves the structural integrity of the SignPost but also enhances its visual appeal.
- **Advanced Material for Durability:**
The upgraded materials reduce corrosion and minimize UV fading, extending the lifespan of the SignPosts even under harsh environmental conditions.
- **Aesthetic Improvements:**
The redesigned bollard presents a more rigid appearance to motorists while maintaining its flexibility to absorb impacts effectively, ensuring both safety and visual appeal.
- **Color and Reflectivity Options:**
Available in standard yellow, with additional options in blue, red, black, and white. A 3" reflective sheeting band is also available in white, yellow, red, orange, green, and blue for enhanced visibility, at an additional cost.

Product Availability:

- **No-Cost Change for New Orders:**
This enhancement is available at no additional cost and will be included in all new orders under the product code STRC. The previous design remains available by special request.
- **End-of-Life Notification:**
Please note that the previous version of the Sta-Rite Bollard will be phased out soon. We encourage customers to transition to the enhanced version for improved performance and aesthetics.
