

PRODUCT BULLETIN

Date: July 1, 2024

Products Affected: FlexRail with Fork Protection Plates (FPP)

Change: Temperature Ratings

With the introduction of Fork Protection Plates, the application of SlowStop FlexRail composite guardrail is now approved for temperatures as low as 32°F / 0°C.

Previously temperatures were limited to 40°F / 5° C for cold storage, however when used in combination with Fork Protection Plates, severe deformation due to impact is eliminated and therefore an exception is granted to use the product to down to the above mentioned limits.

This change is effective immediately for all configurations of FlexRail when used in conjunction with FPP.
